Center for Digital Research in the Humanities

Presenters
Katherine L. Walter, Co-Director
Kenneth M. Price, Co-Director and Hillegass University Professor of American Literature
Purpose

The Center for Digital Research in the Humanities (CDRH) advances interdisciplinary research in the humanities by creating unique digital content, developing tools to assist scholars in text analysis and visualization, and encouraging the use (and refinement) of international standards for humanities computing.

The Center is a collaborative initiative of the University Libraries and the College of Arts & Sciences.
Collaborative research partnerships

- University of Virginia’s Institute for Advanced Technology in the Humanities and the Virginia Center for Digital History
- Brown University
- Duke University
- Georgetown University
- Michigan State University
- New York Public Library
- University of Texas at Austin
- University of Utah
Transportation-related Projects

• Cyberinfrastructure for Spatio-Temporal Event Archival, Correlation and Visualization: Railroads and the Making of Modern America (Will Thomas and Steve Goddard)

• Digging In: Historic Trails of Nebraska (Paul Demers)
